HOME TRAINING SYSTEM

HOME. NO WEIGHTS.

Fifteen movements, a five-day weekly plan and a simple way to get stronger every week. All you need is a wall, a chair and two square metres of floor.

READ FIRST

Before you start

Your own body weight is the load. Results come from three things: clean form, regular sessions, and making the work a little harder over time.

Reading the figures: bright white marks the muscles doing the work; dashed arrows show the direction of movement.

01

Form before reps

Ten clean reps beat twenty sloppy ones. If your form breaks, end the set there.

02

Progress gradually

When you hit the top of every rep range, move to the harder variation, slow the lowering phase to 3 seconds, or shorten the rest.

03

Rest is training

Rest 45–90 seconds between sets and leave a day between hard sessions for the same muscles. That is when you actually adapt.

5 MINUTES

Warm-up

Joint circles (neck, shoulders, wrists, hips, knees)	30 s each
Jumping jacks	1 min
Slow bodyweight squats	10 reps
Slow push-ups, or wall push-ups	8 reps
Cat–cow (on hands and knees)	10 reps

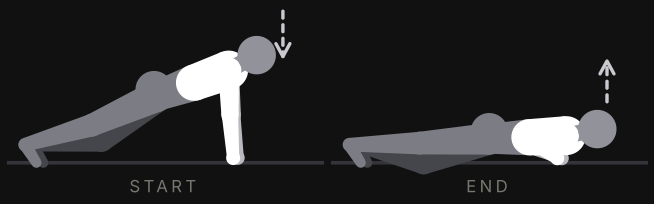

5 MINUTES

Cool-down

Chest stretch (hands on a door frame)	30 s / side
Quad stretch (standing, heel to glute)	30 s / leg
Hamstring stretch (seated)	30 s / leg
Child's pose	60 s

01 Push-Up

UPPER BODY · PUSH

3 sets · 8–15 reps · 60 s rest

TARGETS

Chest · Triceps · Shoulders

1. Hands slightly wider than shoulders; body one straight line from head to heels.
2. Bend elbows at about 45° from your torso until your chest is a fist away from the floor.
3. Press the floor away and exhale on the way up.

AVOID

Sagging lower back or hips rising.

EASIER

On your knees, or hands on a table or stair.

HARDER

Feet on a chair, or a 2 s pause at the bottom.

02 Diamond Push-Up

UPPER BODY · PUSH

3 sets · 6–12 reps · 60 s rest

TARGETS

Triceps · Inner chest

1. Hands under the chest, thumbs and index fingers forming a diamond.
2. Keep elbows close to your body and lower slowly.
3. Press up in a straight, controlled line.

AVOID

Elbows flaring out to the sides.

EASIER

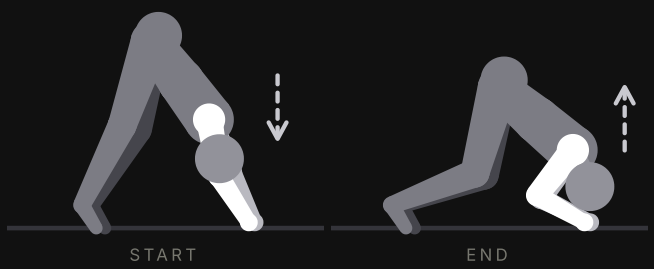

On your knees.

HARDER

Lower for 3 seconds.

03 Pike Push-Up

UPPER BODY · PUSH

3 sets · 6–12 reps · 60 s rest

TARGETS

Shoulders · Triceps

1. Hips high, body an inverted V; walk your feet as close to your hands as you can.
2. Bend elbows and lower the top of your head between your hands.
3. Press through your shoulders back to the V.

AVOID

Hips dropping so it becomes a regular push-up.

EASIER

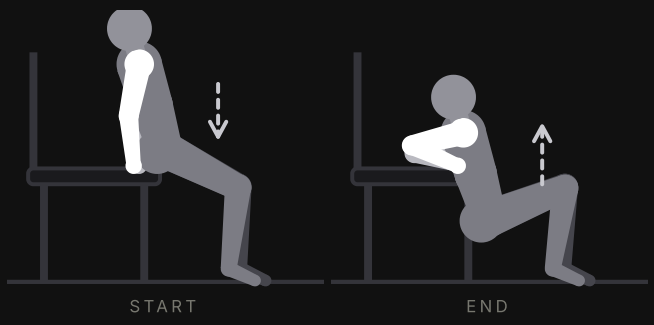

Feet a little farther from your hands.

HARDER

Feet on a chair for a more vertical torso.

04 Chair Dip

UPPER BODY · PUSH

3 sets | 8–15 reps | 60 s rest

TARGETS

Triceps · Front shoulders

1. Hands on the edge of a very stable chair (braced against a wall), hips just in front of it.
2. Bend elbows backwards to about 90°.
3. Press through your palms to straighten.

AVOID

Hips drifting far from the chair, or shoulders shrugging up to the ears.

EASIER

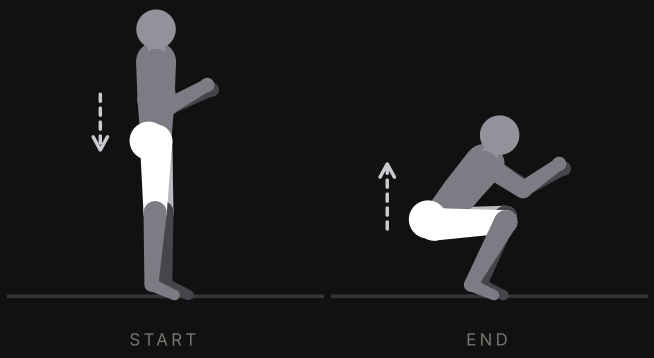

Knees bent more.

HARDER

Legs straighter and farther out.

05 Bodyweight Squat

LOWER BODY

3 sets | 12–20 reps | 60 s rest

TARGETS

Quads · Glutes · Hamstrings

1. Feet shoulder-width apart, toes turned out slightly.
2. Sit hips back and down until thighs are near parallel; chest stays up.
3. Drive through your heels to stand.

AVOID

Knees caving inward, or heels lifting.

EASIER

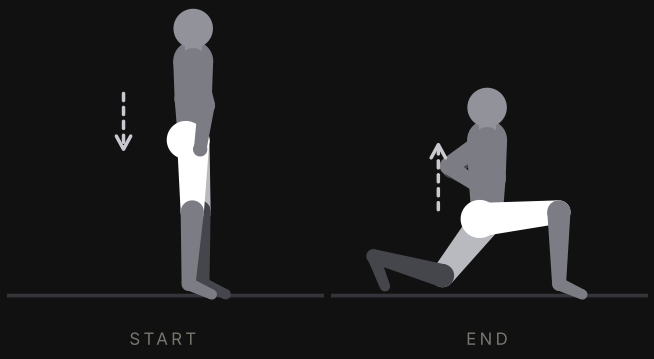

Sit down to a chair and stand up.

HARDER

Jump squats, or lower for 3 seconds.

06 Reverse Lunge

LOWER BODY

3 sets | 10 reps each leg | 60 s rest

TARGETS

Quads · Glutes

1. Stand tall and take a big step backwards with one leg.
2. Lower until both knees are about 90°, back knee just above the floor.
3. Push through the front heel to return to standing.

AVOID

Torso folding forward, or the front knee collapsing inward.

EASIER

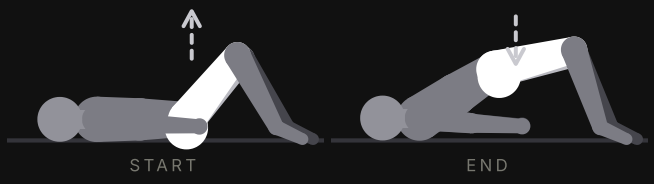

Shorter range, a hand on a wall.

HARDER

2 s pause at the bottom, or jump lunges.

07 Glute Bridge

LOWER BODY

TARGETS

Glutes · Hamstrings · Lower back

1. Lie on your back, knees bent, feet flat on the floor.
2. Lift hips until shoulders, hips and knees form one line.
3. Squeeze the glutes for 2 s at the top, then lower slowly.

AVOID

Arching the lower back instead of driving from the glutes.

EASIER

Smaller range of motion.

HARDER

Single-leg bridge.

3 sets · 12–20 reps · 45 s rest

08 Wall Sit

LOWER BODY

TARGETS

Quads · Glutes

1. Back and hips flat against the wall.
2. Walk your feet out until knees are about 90° and stacked over your ankles.
3. Hold, breathing normally.

AVOID

Resting hands on the thighs (it removes load).

EASIER

Shallower angle (stand a little higher).

HARDER

Over 60 s, or one leg at a time.

3 sets · 30–60 s hold · 60 s rest

09 Superman

BACK · POSTERIOR CHAIN

TARGETS

Spinal erectors · Glutes

1. Lie face down, arms reaching forward, forehead near the floor.
2. Lift arms and legs slightly off the floor together.
3. Hold for 2 s, then lower slowly.

AVOID

Craning the head and neck up too far.

EASIER

Lift opposite arm and leg alternately.

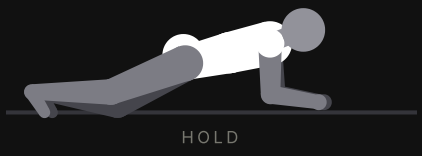

HARDER

Hold for 5 s at the top.

3 sets · 10–15 reps · 45 s rest

10 Forearm Plank

CORE

TARGETS

Abs · Shoulders · Glutes

1. Forearms on the floor, elbows directly under shoulders.
2. Body in one straight line; brace abs and squeeze glutes.
3. Look at the floor and breathe normally.

AVOID

Sagging lower back or hips piking up.

EASIER

On your knees.

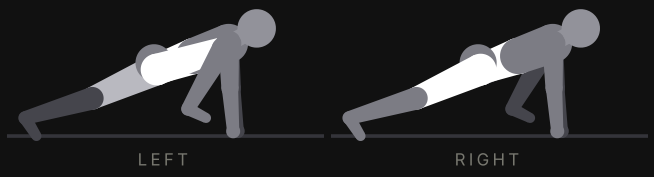

HARDER

Lift one leg, or hold over 60 s.

3 sets · 20–60 s hold · 45 s rest

11 Mountain Climber

CORE · CARDIO

TARGETS

Abs · Shoulders · Hip flexors

1. High-plank position, hands under shoulders.
2. Drive knees towards your chest, alternating quickly.
3. Keep hips level with your shoulders.

AVOID

Hips bouncing up and down.

EASIER

Slower pace.

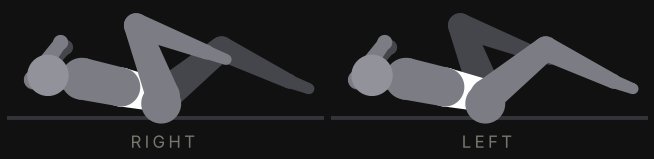

HARDER

Faster pace.

3 sets · 30 s work · 30 s rest

12 Bicycle Crunch

CORE

TARGETS

Abs · Obliques

1. Lie on your back, fingertips by your head; do not pull your neck.
2. Bring one knee in and rotate the opposite elbow towards it.
3. Alternate sides slowly and under control.

AVOID

Pulling on the neck with your hands.

EASIER

Smaller range of motion.

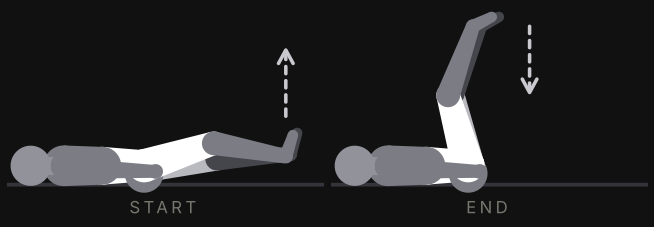

HARDER

Slower, with a pause on each side.

3 sets · 12–20 reps each side · 45 s rest

13 Leg Raise

CORE

3 sets · 8–15 reps · 45 s rest

TARGETS

Lower abs · Hip flexors

1. Lie on your back, hands under your hips, lower back pressed into the floor.
2. Raise straight legs to about 90°.
3. Lower slowly without letting heels touch the floor.

AVOID

Lower back peeling off the floor.

EASIER

Knees bent.

HARDER

2 s pause just above the floor.

14 Burpee

FULL BODY · CARDIO

3 sets · 6–12 reps · 60 s rest

TARGETS

Whole body · Conditioning

1. From standing, squat down and place your hands on the floor.
2. Step or jump your feet back to a plank (optional: one push-up).
3. Bring feet back in and finish with a jump.

AVOID

Hips sagging in the plank position.

EASIER

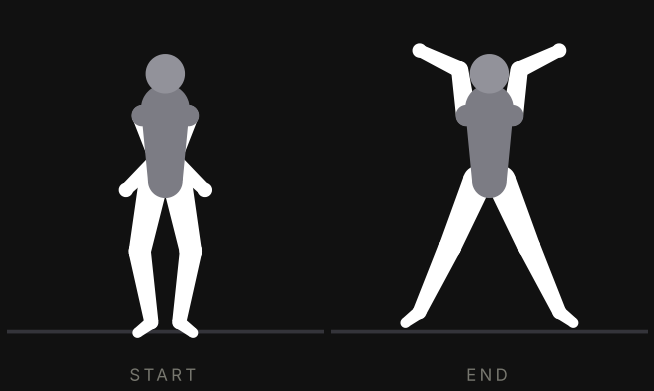

Step back and forth, no push-up or jump.

HARDER

Add the push-up and a high jump.

15 Jumping Jack

FULL BODY · CARDIO

3 sets · 30–45 s work · 30 s rest

TARGETS

Heart · Legs · Shoulders

1. Stand with feet together and arms at your sides.
2. Jump your feet apart and swing arms overhead.
3. Jump back to the starting position.

AVOID

Landing stiffly on your heels.

EASIER

Step-jacks without jumping.

HARDER

Faster pace.

FIVE DAYS ON, TWO OFF

Weekly plan

Each session takes roughly 35–45 minutes including warm-up and cool-down. Sets and reps for each movement are on its card.

MON	TUE	WED	THU	FRI	SAT	SUN
Upper · Push	Lower body	Rest	Conditioning	Back · Core	Full body	Rest

Bar height shows relative effort for the day (a rough guide).

MON	**Upper · Push**	Push-Up · Pike Push-Up · Chair Dip · Plank
TUE	**Lower body**	Squat · Reverse Lunge · Glute Bridge · Wall Sit
WED	**Rest**	Easy 20–30 min walk, light stretching
THU	**Conditioning**	4 rounds: Jumping Jack · Burpee · Mountain Climber · Squat (30 s on / 20 s off)
FRI	**Back · Core**	Superman · Bicycle Crunch · Leg Raise · Plank
SAT	**Full body**	Diamond Push-Up · Squat · Reverse Lunge · Mountain Climber · Plank
SUN	**Rest**	Full rest or a relaxed walk

8-WEEK PROGRESSION

W1–2

Bottom of each rep range. Focus on form. Use the easier variation if needed.

W3–4

Reach the top of each range, complete all sets, trim rest by 10–15 s.

W5–8

Switch to the harder variations, or lower for 3 seconds.

After

Change one variable at a time (tempo, pause, difficulty) and log it.

GOOD TO KNOW

Notes

Food and sleep

Gaining muscle and losing fat depend as much on enough protein, 7–9 hours of sleep and weeks of consistency as on the workouts themselves.

The limits of bodyweight

Pulling movements such as pull-ups are hard without equipment, and Superman is not a full substitute. If you have a very sturdy table, lie underneath and pull yourself to its edge (inverted row); it is the best pulling option at home.

Pain

Muscle burn is normal; sharp pain in a joint, your lower back or knees is not. Stop if that happens. If you have an injury or medical condition, check with a doctor or coach first.

Consistency

Three regular sessions beat six unstable ones. Pick a fixed time and just start the first set; the rest gets easier.

CONSISTENCY > INTENSITY
